BULLETIN NO. 1

-1-

THURSDAY, JUNE 5, 1980

The Daily Bulletin is published by the Institute of Government each day the North Carolina General Assembly is in session. It is distributed to members and staff of the General Assembly, state and local governmental officials, and the news media in an attempt to assist them in understanding pending legislation and in following the progress of that legislation. This is one of the ways The University of North Carolina at Chapel Hill attempts to serve the citizens and governmental officials of North Carolina. Other activities of the Institute of Government include the publication of a quarterly magazine, as well as manuals and bulletins for local and state governmental officials, the holding of courses and conferences for citizens and governmental officials, and consultations with governmental officials on specific problems.

The Daily Bulletin is easy to use if one becomes familiar with it. Each issue contains, in order, summaries of House and Senate public bills introduced, summaries of House and Senate local bills introduced, summaries of amendments, committee substitutes, and conference reports adopted in the House and Senate, and on the white pages a list of all floor actions that took place on bills that day. The list of floor actions is reproduced from information entered in a computer-based bill status and history system, which is maintained by the Institute and the Legislative Services Office with the cooperation of the Office of State Management Systems of the Department of Administration. The list of actions contains symbols to indicate the bills that have been ratified or have failed and to show the dates of any earlier amendments to a bill.

The Institute of Government also publishes a Weekly Summary and weekly status reports for public and local bills. For information on these publications, or for further information about matters contained in the Daily Bulletin, call or write the Institute at the address/telephone number indicated on the masthead of this Bulletin.

The 1980 Session

The 1980 session of the General Assembly convened today at 12 noon. Under terms of resolutions (Res. 74 and 84, SL 1979) passed last session, the session will be limited to the following bills: (1) bills directly affecting the budget; (2) bills introduced in 1979 that passed one house and were not unfavorably acted upon in the other house; (3) bills authorized by a resolution passed by a two-thirds majority in each house; (4) bills implementing study commission reports; (5) bills implementing reports of the Governmental Evaluation ("Sunset") Commission; (6) resolutions relating to membership on the new community college board; (7) noncontroversial local bills filed by Tuesday, June 10; and (8) 1979 bills (H 813 and S 499) relating to the collection of money judgments.

Since the 1980 session is a continuation of the 1979 session, the numbering of bills and session laws continues sequentially from the last day of the 1979 session. When we summarize actions on a bill that was introduced in the 1979 session, we may refer to 1979 Bulletins. When we do so, we will specifically identify those Bulletins. Otherwise, all cross-references to pages in the Bulletin will refer to 1980 Bulletins.

CHANGES IN 1980-81 STATE BUDGET

H 1560/S947, introduced today, contain changes in the 1980-81 state budget that are recommended by the Governor and the Advisory Budget Commission. The recommendations include an increase in appropriations of \$358 million (\$331M from General Fund; \$27M from Highway Fund) over the amount appropriated for 1980-81 by the 1979 session of the General Assembly. Most of the additional money in the General Fund comes from greater than anticipated state revenues (\$150M in 1978-79 and \$77M in 1980-81), expected reversions in 1979-80 (\$80M), and a greater than anticipated credit balance for 1978-79 (\$24M more than anticipated). One reason why revenues exceeded estimates in 1979-80 is that the expected recession did not occur in 1979. Instead it is now expected to run from the second quarter of 1980 through mid-1981. Real personal income in North Carolina is expected to decline 1% in fiscal 1980-81, and there will be an overall slackened rate of growth in the state's economy.

The bulk (\$295M) of the \$358M in additional appropriations will be for salary increases for teachers and state employees, public school educators and additional retirement benefits for active and retired employees. Another large sum (\$43M) will go for increased energy-related costs of maintaining state programs at their current level of service. There is only a small amount (\$2.8M from General Fund; \$371,000 from Highway Fund) for additional capital improvements.

Revenue collection for the Highway Fund is experiencing difficulties. The motor fuel tax accounts for approximately two-thirds of the Fund, and it is expected to decrease by 5% in 1979-80 and by 2.2% more in 1980-81. Some of the causes for the decline are increasing motor fuel prices, more efficient vehicles, and weakening economic conditions. The Governor and Advisory Budget Commission have recommended a change in the method of funding highway contracts in 1980-81 that will result in a one-time saving of \$57.3M. Presently, the entire amount of a construction contract is encumbered in the appropriations for the current year, even though it will be spent over several years. The change to a "cash flow" method will encumber funds in the current year only to the extent that expenditures will be made in that year. (A study group is currently examining the Highway Fund and is expected to report its findings before the beginning of the 1981 General Assembly.)

Listed below are the highlights of the proposals of the Governor and Advisory Budget Commission. The figures are rounded-off, and not every item is listed. Only the items recommended for funding from the additional \$358M are listed; unless otherwise indicated, all appropriations in the 1979-81 budget passed last year are recommended for continuation. All items listed are from the General Fund unless otherwise indicated.

1. The first thing I noticed when I stepped out of the car was the cold. It was a sharp contrast to the warm blanket I had been under. I looked around and saw a few other people standing in the snow, all of them looking at each other with expressions of surprise and curiosity. I felt a little awkward, but I tried to ignore it and focus on the task at hand.

THE 1910

2. As I walked towards the building, I noticed that the snow was falling again. It was a beautiful sight, but it also made it difficult to see. I had to be careful not to trip over the uneven ground. I felt a little nervous, but I knew I had to do this. I took a deep breath and continued on my way.

THE 1910

3. When I reached the building, I saw that the door was open. I walked inside and found a large room with a high ceiling. There were several people sitting at tables, and I felt a little out of place. I looked around and saw a man in a suit standing near the door. He looked at me and smiled.

Amends GS 14-6 to make accessory before the fact to crime of stealing horse, mule, etc., punishable as any other crime of larceny (now felony punishable by 20 years imprisonment and/or fine). Amends GS 14-284.2 [dumping toxic substances] to classify it as Class H felony and to make it clear that violation may also be punished by fine of up to \$100,000 per day of violation. Amends various other statutes, including GS 14-27.2 through -27.7 [new sex offense statutes], to classify them in appropriate class under GS 14.1.1, so that present maximum imprisonment for offense is same as maximum imprisonment for category in which offense is classified.
